

John wanted to pay for a new hat at the register with a gift card that his grandparents gave him for Christmas. He has used it a couple times but he is pretty sure he can pay \$20 with the gift card.

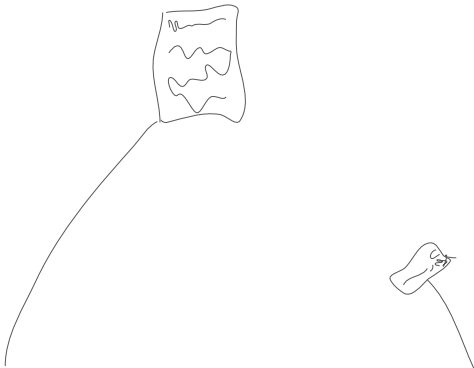

John's gift card was declined, the man behind the register said "I don't think your gift card has enough money on it man". John felt embarrassed and thought to himself how could he get around this.

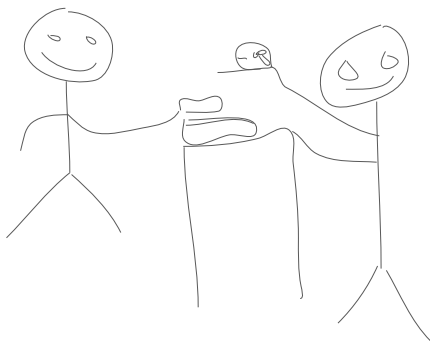

John remembered about that awesome app that came out that can check how much money you have on a gift card! He pulled out his other gift card his mother gave him for his birthday to check how much is on that!

John decided to use our app to find out how much money is on his other gift card. He didn't want to embarrass himself again, he was relieved to find out he had \$30 on this one!

John swiped his other card and avoided embarrassment by his gift card getting declined again by using our app!

John is very thankful for our app and loves his new hat! Our app has helped him see how much money is on his gift card without calling the gift card's number, if it has even has one! John will now use this before going out to know how much money is in his gift cards all the time. Be like John!
